DETAILED ACTION

This Office Action is in response to a communication made on August 2, 2005.

The Information Disclosure Statement has been received on August 1, 2005.

Claims 1-11, 14-16, 18, and 20 have been amended.

Claims 1-20 are pending in this application.

Election/Restrictions

Restriction to one of the following inventions is required under 35 U.S.C. 121:

- I. Claims 1-9, drawn to a distributed access control system including local and central servers, classified in class 709, subclass 229.
- II. Claims 10-20, drawn to directing user access requests to certain servers in a distributed system, classified in class 709, subclass 223.

Inventions I and II are related as subcombinations disclosed as usable together in a single combination. The subcombinations are distinct from each other if they are shown to be separately usable. In the instant case, invention II has separate utility such as forwarding a user request to a more local and optimum server for handling the user requests. See MPEP § 806.05(d).

Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, restriction for examination purposes as indicated is proper.
